

Altimune to Present at 18th Annual Rodman & Renshaw Global Investment Conference

Gaithersburg, Maryland – August 30, 2016 - Altimune, Inc., a clinical stage immunotherapeutic company, today announced that management will be presenting at the 18th Annual Rodman & Renshaw Global Investment Conference to be held September 11 - 13, 2016 in New York, NY.

Bill Enright, Chief Executive Officer, is scheduled to present on Tuesday, September 13, 2016 at 10:50 AM ET.

About Altimune

Altimune is a clinical stage immunotherapeutic company focused on the development of products to stimulate robust and durable immune responses for the prevention and treatment of disease. The Company has two proprietary platform technologies, RespirVec and Densigen, each of which has been shown to activate the immune system in distinctly different ways than traditional vaccines. Using these technologies, Altimune has developed three novel clinical stage product candidates that potentially represent an entirely new approach to harnessing the immune system.

The Company's most advanced product candidate, NasoVAX, is a Phase 2-ready intranasally-delivered recombinant influenza vaccine offering broad and rapid protection with potential for significant advantages over traditional flu vaccines. The second most advanced product candidate, HepTcell, is being tested as an immunotherapy for patients chronically infected with hepatitis B and has the potential to provide a functional cure. With the support of the U.S. Biomedical Advanced Research and Development Authority, or BARDA, the Company is developing a third product candidate, NasoShield, a first-in-class anthrax vaccine designed to provide rapid, stable protection after one intranasal administration. The Company intends to leverage the RespirVec and Densigen platforms to develop additional product candidates for a variety of indications.
